## **ADMINISTRATIVE NOTES**

**Keeping these files in an online storage area such as Google Drive, Drop Box, iCloud etc. is mostly imperative for this to work as intended.**

**It is also suggested to keep these files on your computer to easily email them from your computer. Simply create a 'Networking' folder somewhere on your computer and save them to that folder.**

**Though not critical, you could also save a copy of the files From Your Computer... To Your Cell Phone. Simply connect your cell phone to your computer, open the filing system, create a folder and just copy them to your phone.**

**For easy access, create a shortcut to the files or folder on your cell phone screen.**

### **HERE'S THE POINT TO ALL THIS**

**You will never be without a business card.**

**You can follow up with anyone... From anywhere**

**With what you want them to know about you  
You can give your digital business card to your business networking partners so that they too will be able to share and refer you at any moment in time. That is after all a significant point to business networking groups.**

**Please Know This... The people you want networking for you have no way to help you unless you provide that way... THIS IS THAT WAY!**
